

The team at GYO understands that there is no one-size-fits-all esports solution for schools and universities. Each institution has unique concerns, needs, and demographics that must be served and we know that institutions must place an emphasis on education above all else.

We empower you to make good decisions that are right for you when it comes to the adoption and implementation of an esports program at your school.

Our comprehensive approach deals with every aspect of esports integration from facilities, to operational structures, to pedagogy, to community outreach and we provide you with software that supports everything you want to accomplish.

- Last year our GYO.gg scoring platform was the basis for esports athletes receiving over 200 college scholarship offers, more than 5x more than any other recruiting platform in the market
- We are an official partner and provide recruiting software for the National Association of Collegiate Esports (NACE) and their 220+ member schools
- We have consulted with cinemas, casinos, shopping malls, youth sport institutions, venture capital firms, colleges and cities on the subject of esports
- Over 260,000 gamers and over 2 million games have been tracked in our system. 25,000+ gamers have registered with us to advance themselves and seek teams and scholarships

OUR SERVICES

- Facilities design, LAN center integration, deployment and, in certain circumstances, funding
- Organization-specific league creation and management
- Outreach community league creation and management
- Curriculum integration
- Legal compliance

Past and Current Clients Include

OUR PROCESS

Our goal is to provide a custom, comprehensive whitepaper for your organization that will lay out options for an esports implementation approach based on your input.

Our Process Includes:

1. No-cost initial remote consultation to define scope and your program goals and objectives
2. 2-day on site workshop intensive with key stakeholders to obtain further understanding about key concerns and goals
3. We provide a whitepaper plan outlining suggested approach and key considerations for your program
